## HOUSEWIFE WITH A PASSION

Thanks for giving this opportunity to remember those wonderful days of my life. I am Sonal Shivaji Chavan. I was Student of Women's collage of Home Science and BCA Loni in year 2014. It was the best days of my life because it's a turning point in my career where I experienced success as well as a failure too. I have learned so many good things while interacting with our professor's. Free time we all friends are together playing some games and class time studying together. In final year there are so many events and interviews, Trainings, Celebrations, fancy dresses and we were wearing sarees. At the end writing slam books to keep memories. The day's move fast. Finally slam book which help me to put all memory in book, at the end we got passed out and leave from our college.

Family is everything, but sometimes it can be difficult to put into words just how much your loved ones mean to you. Within few months I got married with Digambar he is IT professional, his brain less in official work but more in social activities and politics. Today's generation always gave priority to carrier and source of income. He decided family is first priority then carrier, surprising within year ways of life change when we become a Parent. The minute my daughter was born I was instantly transformed. I was no longer me, I was Mom, and that is the most powerful feeling in the world.

While living in family life. I am fully occupied with my daughter and become a perfect house wife. I keep spending my time in cooking delicious food for my daughter and family. Many times I used to serve the recipes to my friends then they appreciate me. One day one of my friend told me "I love the Meals that you prepared! Perhaps, you can start teaching me so that I can enjoy the test of your hand in entire life". Everyone keep appreciating on my cooking and suddenly we decided to start our YouTube channel. And it was turning point for my life and I started my YouTube channel "SONALS RECIPE". The day is "Maker Sankranti" I Publish my First recipe "Til Laddu" on YouTube channel. it was not concern about revenue but it is satisfaction to teach how to prepare healthy delicious food. Food is fast growing category on YouTube and I keep experimenting different recipes veg & nonveg category. The beauty of my channel is recipes for all age from new born baby to great grandfather.

The consistency is key for every success story. I keep uploading 100 recipes within year. One day I was surprised there is mail from YouTube "Your Channel is monetized". Then hobby is part of revenue and I am become a foodie You Tuber. Advertisement on YouTube channel is main income source of money. The video series soon become my channels centrepiece and the touch tone for my success. I keep Commitment to audience to provide frequent new episodes of a large CatLog of recipe for the growing subscribers.

"At the end I WOULD LIKE TO GIVE MESSAGE TO HOUSE WIFE WITH PASSION TO DO SOME THING".

There are millions of well educated house wife in India. For mom's who are unable to go out to work, Work From Home is a great opportunity. There are so many opportunities out there, so which one to choose?

Every buddy having power of internet, If you don't know anything about making money online. Follow your passion and increase your ability. Just try to gain some skill learn everything from google, blogs, YouTube etc. If you have talent then you can make. Thousands of money by sharing skills and selling your hand made products painting, wall hangings, rope bowls, sew pillow covers, bamboo and wooden products many more.

You can be a tutor. You can start online and offline tutoring. If you are a teacher or if you professional skills having a demand than you can teach people that skill.

You can start a blog. Nowadays blogging is a serious business. Develop an eye catchy blog. Write helpful, informative post. After getting some traffic, monetize your blog content using ads, affiliate marketing etc.

You can start a YouTube Channel. Just create some video content and upload them on your YouTube channel. You can earn money along with fam. Really YouTube is a great platform to share your knowledge and earn money. Just do something different.

You can do every online job at home. And there are many ways to make money online.

I hope you got a simple, informative. You have power to change your lifestyle.

Thank You.
